Art-No. 80215 50 cm

**Brush Blu BETONAC**  
Art-No. 80216 20 cm  
Art-No. 80217 50 cm

Our acid- resistant brushes have been especially designed for cleaning concrete pumps and vehicles that transport concrete. Their unique advantage is that they hold the liquid cleaning agent in the bristles.

## These brushes really save you money !

Experience has shown and studies reveal that up to 90% of a liquid cleaning agent gets wasted on the way from the bucket to the surface on which it is meant to be applied. It pours onto the ground unused.

## Lets do some quick sums:

Ten litres of water containing concentrated cleaning agent costs 4 Euros

	% Wasted cleaning agent	Cost of Wasted cleaning agent (on the floor)
<b>Normal brush</b>	90 %	3.6 Euros
<b>BETONAC brush</b>	<b>40 %</b>	<b>1.6 Euros</b>

**Thus six times more product reaches the surface you want to clean when you use a BETONAC BRUSH**

## The money-spinning brushes

	Art.-No.	Article	cm	price/Euro per unit	bulk price (12 +)
